INDUSTRIAL MATERIALS SOURCING AND SUPPLY

An alternative source for your industrial raw materials.

We help manufacturers and formulators explore alternative supplies of epoxy resins, coatings raw materials and related industrial chemicals. We assess each enquiry against the required grade, quantity, delivery destination and commercial terms. Our aim is to improve your delivered price and terms for a technically suitable material. We confirm the offer in a written quotation.

WHAT WE CAN SOURCE

01 Core resin supply

VOLUME REQUIREMENTS

Liquid and solid epoxy resins, quoted against the grade, application, packaging and volume you need.

02 Speciality materials supply

SPECIFIC TECHNICAL REQUIREMENTS

Solvent-cut epoxy resin solutions, curing agents, reactive epoxy diluents and epoxy phenol novolac resins. We confirm the technical fit and supplier availability before quoting.

03 Tailored materials sourcing

OTHER MATERIALS YOU NEED

Send us the specification for other industrial chemicals, additives or raw materials you need. We will assess whether we can source a suitable option on workable terms.

GIVE US A REQUIREMENT TO QUOTE ON

Share the product grade or datasheet, approximate quantity, delivery destination and required delivery date. Tell us which commercial terms matter to you.
